

SODIUM FORMATE

Sodium Formate is a white crystalline material. It is used in the production of sodium hydrosulphite/ dithionite, a bleaching agent for pulp and paper, in the leather tanning process and as deicer.

Product Description

- ✓ Sodium Formate
- ✓ White powder
- ✓ Soluble in water

Product Specification:

Sodium Formate contentmin, % ¹	min 97.0
Water content, % ²	max 0.5
Organic substances, % ³	max 3.0

Applications

- ✓ Production of Sodium Hydrosulphite
- ✓ Production of Formic Acid
- ✓ Leather Tanning
- ✓ Enzyme Stabilizer in Detergents

Storage

- ✓ Sodium Formate is hygroscopic and should be handled to prevent moisture absorption.
- ✓ Sodium Formate has a tendency to cake during Storage.

Package Specification:

- ✓ Sodium Formate is available in 25 kg Packing.
